Forecast for Thursday 20 Jul 2023

Weather: Mostly dry start with sunny spells, although any patchy early valley fog is likely to quickly clear. Scattered showers developing through the morning, with the odd sharp shower possible by afternoon. Some areas may stay dry, however. Showers become more isolated from late afternoon to give a generally fine evening.

Chance of cloud-free hill tops above 600m: 80% at first, soon becoming near 100% through the morning.

Low Cloud and visibility: Any overnight fog quickly clearing, with early patches of summit cloud soon lifting comfortably above summits during the morning. Visibility generally good or very good, perhaps briefly poor in any heavier showers, or very poor in early low cloud covering the hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite the risk of showers, UV levels remain high in sunny spells, so sun protection is advisable.

Recent rainfall: measured at Malham: altitude 375m

02:00 on Thu 20 Jul 2023	0mm	5.4mm	9.2mm

Forecast for Friday 21 Jul 2023

Weather: Probably becoming rather cloudier through the early hours with scattered showers developing soon after dawn. However, some cloud breaks should develop through the morning to give some sunny spells but still with a scattering of occasionally sharp showers. Cloud likely increasing again during the afternoon, bringing more persistent rain during the evening. Some uncertainty in the timing of this, however.

Maximum wind: West to northwest 15 mph gust 25 mph.

Chance of cloud-free hill tops above 600m: 80% through the morning, probably gradually lowering through the afternoon and evening to become 30%.

Low Cloud and visibility: Any overnight patches of summit cloud soon dispersing, then cloud should remain above summits through the morning, gradually lowering through the afternoon and evening with areas of cloud base 500-600m later. Generally very good visibility at first, but moderate in rain or showers, becoming very poor at times later in low cloud covering hills.

Temperature: **Valleys:** Plus 9 degrees Celsius rising to Plus 18 degrees Celsius.
At 600m: Plus 8-11 degrees Celsius.
Freezing level: Above summits.
